

# Microsoft's Datacenter Economic Impact in Georgia

Microsoft is making significant investments in datacenters across South Fulton and Douglas counties, driving billions in local economic impact through job creation, tax revenue, and community programs.

### Since 2019

\*Microsoft's economic activity of \$1.2 billion does not include other investments in capacity in the Greater Atlanta region.

### Community investments

We invest hyper-locally where we build datacenters. In the greater Atlanta area, we have supported STEM education opportunities, skilling and technology development, and the local environment through community investments.

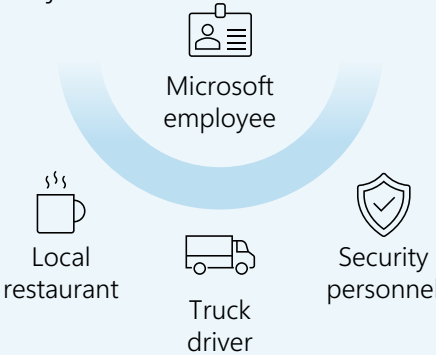

### Future economic impacts

For every 1 operations job at a Microsoft datacenter, 1.3 additional jobs are created in local businesses through 2027. More jobs are expected as more datacenters come online.

The local economy benefits from datacenter development and creates jobs in multiple industries. This includes direct, indirect, and induced jobs.\*\*

## Future datacenter economic impact

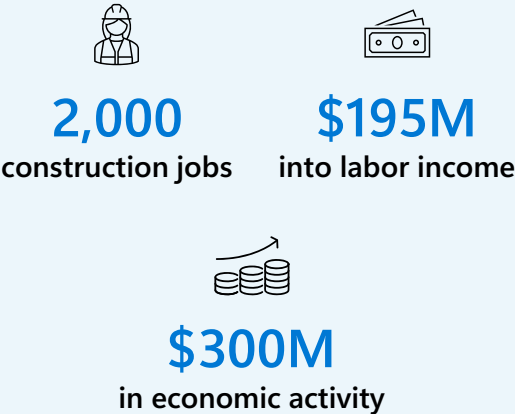

### Operational impact from 2026 – 2027

	Economic activity*	Local jobs**	Labor income
in 2026:	\$200M	1,000	Over \$100M
in 2027:	\$550M	2,000	Over \$250M

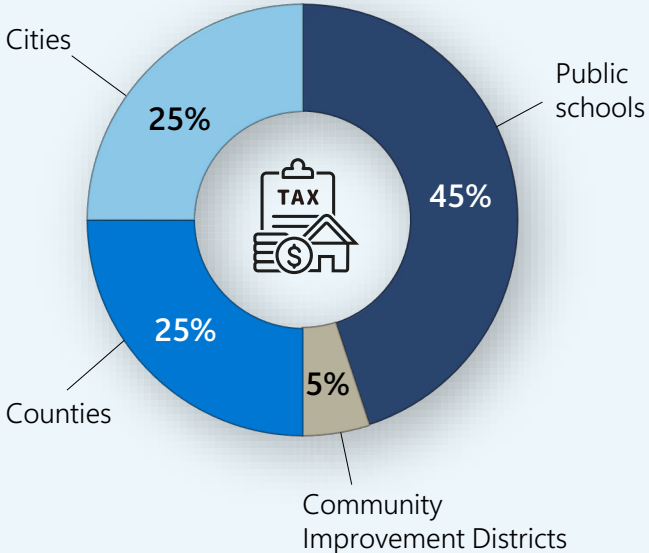

\*Economic activity is how people earn and spend money, helping communities grow through jobs, shopping, and local services.

\*\*Local jobs include direct jobs, which are the people hired for a datacenter, indirect jobs which help by providing services like truck drivers, and induced jobs which are created when those workers spend money in the community, like workers at a local restaurant.

### Additional construction-based economic impact (through 2027 with more expected):

### Microsoft property taxes supporting communities (through 2027):
