

Microsoft's datacenter economic impact in Cheyenne, WY

Microsoft is making significant investments in datacenters across Laramie County, Wyoming, driving billions of dollars in local economic impact through job creation, tax revenue, and community programs.

Operations since 2019

\$1.6 billion
in economic activity*

\$285 million
in local labor income

+1,000
On-site contractors and additional jobs supported*

320
Microsoft direct jobs in 2025

Construction since 2019

\$1.4 billion
in economic activity*

3,900
local jobs** supported

\$300 million
in labor income

Ongoing economic Impacts

4.4x jobs

For every 1 operations job at a Microsoft datacenter, 4.4 additional jobs are created in local businesses through 2028. More jobs are expected as more datacenters come online.

The local economy benefits from datacenter development and creates jobs in multiple industries. This includes direct, indirect, and induced jobs.**

Microsoft's datacenter economic impact in Cheyenne, WY CONTINUED

*Economic activity is how people earn and spend money, helping communities grow through jobs, shopping, and local services.

**Local jobs include direct jobs which are the people hired for a datacenter, indirect jobs which help by providing services like security vendors, and induced jobs which are created when those workers spend money in the community, like workers at a local restaurant.
